

Student Profiling System for Minanga Integrated School (SPSMIS)

Detailed Frontend Prototype Specification for Claude AI

Project Goal

Build a presentation-ready frontend prototype only. No backend, database, API, or server-side code. The prototype should look and behave like a real system using localStorage and mock data. Target users: Administrator, Teacher, Student.

Technology Stack

HTML5, CSS3, Bootstrap 5, JavaScript, Chart.js, Font Awesome. Use reusable layouts and components.

Architecture

views/, components/, assets/, data/, docs/. Create reusable navbar, sidebar, footer, modal, toast, cards, and table components.

Student Portal Requirements (Mobile First)

The Student Portal must be designed primarily for smartphones. Target resolutions: 320px, 375px, 425px, 768px. Features: • Login • Forgot Password • Student Dashboard • Profile • Settings • Logout Mobile UI: • Bottom Navigation • Touch-friendly controls • Responsive cards instead of tables • Profile summary card • Quick actions • Modern mobile-app appearance similar to Google Classroom

Administrator Portal (Desktop Only)

Desktop optimized (1366x768 and above). If screen width is below 1024px, show a desktop-only warning. Features: • Dashboard • Student Management • Reports • Account Management • Settings • Analytics

Teacher Portal (Desktop Only)

Desktop optimized. Features: • Dashboard • Student Profiles • Grade Management (SF10) • Reports • Settings

Admin Dashboard

Cards: • Total Students • Elementary Students • Junior High Students • Senior High Students
Charts: • Enrollment Distribution • Gender Distribution • Students Per Grade Level

Student Management Module

Add Student Form: • LRN • Grade Level • Section • First Name • Middle Name • Last Name • Sex • Birthdate • Age • Mother Tongue • Religion • Address • Parent Information • Guardian Information • Contact Details • Email Actions: • Add • View • Edit • Search • Filter

Reports Module

Generate student reports. Filters: • School Year • Grade Level • Section Search: • Name • LRN
Provide printable layouts.

Account Management

Display: • Total Accounts • Active Accounts • Inactive Accounts Actions: • Activate • Deactivate •
View Account

Teacher Grade Management

Display SF10 information. Grade entry form. Edit grades. View grades. Save grades to
localStorage. Use modal dialogs.

Settings Module

Security Questions. Password Change. Profile Settings. Logout Confirmation Modal.

Mock Data Requirements

Generate sample students: • Juan Dela Cruz • Maria Santos • Pedro Reyes Generate: • Profiles •
Grades • Reports • Analytics

Claude AI Development Instructions

Build the project module-by-module. Phase 1: Authentication pages. Phase 2: Reusable layout
system. Phase 3: Admin dashboard and analytics. Phase 4: Student management. Phase 5:
Teacher grade management. Phase 6: Student mobile portal. Phase 7: Reports and settings.
Phase 8: UI polish, responsiveness, animations, and testing. Important: No backend code. No
database. No PHP. Use localStorage and mock JSON only. Focus on presentation quality and
realistic interactions.
